

# The Carbon Chronicle

VOLUME 24, NUMBER 28

CARBON, ALBERTA, THURSDAY, JUNE 28, 1945

\$2.00 A YEAR; 5c A COPY

## LONG YEARS AGO

June 28, 1928

Walter Bramley, who was injured in a local mine on Feb. 25th, died in the Holy Cross hospital last Friday as a result of injuries.

A sample of spring wheat taken from the Stewart Mortimer farm on Monday measured 28 inches high, indicating the fine growth of crops so far this year.

Messrs. W. Herbert and R. Mackay returned Monday from a motor trip to the Peace River country, but were not impressed with the possibilities there.

Rockyford and Iriana Golfers will play at Carbon Sunday in the first round of the Heralds District Play-Offs.

**CANADA THEIR NEW HOME:** W. Garfield Weston, Canadian-born member of the British House of Commons, who has given up politics to devote all his time to his extensive business and pulp and paper interests in Canada, was enroute to his new home in Vancouver with his wife and five of their nine children on the Canadian Pacific

Railway's transcontinental Dominion when this picture was taken. The two older Weston girls went on to Toronto, their father's home, to visit after the family arrived in Montreal by freighter. Still in England are the two older boys, one serving on a Canadian Navy corvette and the other at Oxford waiting his call.

The foundation on the S.N. Wright residence is being constructed and preparations are being made to move the house from the "island" to the new location.

Mrs. W. Poxon Sr. of Drumheller had the misfortune to fall and break her right wrist, while on a trip to Saskatchewan.

## CHRONICLE TO SUSPEND PUBLICATION

Publication of The Carbon Chronicle which has been made from Didymus for past six weeks, has proved too much of a burden on the staff and until such time as a competent printer can be secured to take over the business and print the paper from Carbon, it has been found necessary to suspend publication for a time.

This does not mean that the paper at Carbon will be discontinued. The arrangement is only temporary and subscribers can look forward to a continuance of their paper at an early date—we hope.

## WHERE CANADA EXCELS

Although it is not generally well known, two other metals besides iron possess magnetic properties—nickel and cobalt. Canada is the world's greatest producer of nickel; the town of Cobalt in Ontario was named after the large deposits of metal located there; and Steep Rock, a subterranean iron mine in Western Ontario which was only uncovered after the entire lake was diverted, is now producing iron which rivals the famous Swedish iron.

## HELP ON THE FARMS

(By Major H.G.L. Strange)

In spite of the fact that one half of our global war is over, there is still, and is likely to be for the whole of this year, a serious shortage of labour on Western farms. The hungry people of Europe and almost all countries, are clamouring for food. There are still great needs of food by our own and our Allies' Armed Forces.

While we have plenty of wheat in Canada, there is, even in the United States and Canada, a shortage of livestock and livestock products, because of their high national value, that are needed most by the Armed Forces and by European people. The production of livestock, and livestock products, as we all know, requires more labour than the production of grains alone. The amount of grains, therefore, that will be fed to livestock will depend to some extent at least, upon the labour available. The past war years have shown that students from high schools and universities, during their vacations, have helped in producing livestock and livestock products by working on our prairie farms. I suggest that students once again this year should consider making this same important and valuable contribution to Canada's war effort. Life on a farm during the summer is agreeable and interesting, and the work will not be found to be too hard.

## FRENCH LOSSES GREAT

One hundred and thirty-five thousand and dead on the field of battle, 55,000 killed before firing squads, 100,000 patriots who have died in enemy camps or prisons, two million prisoners and deportees, 1,200,000 houses destroyed, ports and trains demolished, the suffering by a whole nation of occupation, oppression and famine—that is the contribution in blood and distress which France has made to this war in the cause of liberty.

## NEW LOCKER PLANT TO OPEN ON JULY 4th

The Cold Storage Locker Plant, which has been under construction at Carbon for the past three months has now been completed and will open for business on Wednesday, July 4th.

Mr. R. Campbell, formerly of Cold Storage Lockers, will be in charge of the Carbon plant, which is one of the most modern in the province.

On Wednesday, July 4th at 3 p.m. a meeting is to be held in the Scout hall, where description and details of the locker will be given. Mrs. J. Arnold will give a talk of special interest to women on the preparation of fruit and vegetables for storage.

General plant inspection will follow the meeting.

## 1500 CARS OF WHEAT DAILY

The prairie provinces of Canada are now witnessing an exodus of wheat which is likely to clean out most of the reserves that have been stored in country elevators and annexes during the war years. The wheat board is aiming at shipping 1500 cars of grain a day from Manitoba, Saskatchewan and Alberta which, at the average of forty cars per train, would represent some 37 trains daily.

During the war years grain piled up at interior terminals and country elevators. In order to accommodate the large carboys, the accommodation of country elevators was increased by the building of annexes and the utilization of suitable empty buildings in towns and villages. In this way storage for about 173 million bushels of grain was provided.

Now the war is over and Hungary is crying for food, Canada is undertaking a movement of wheat from the prairie, down the Great Lakes and across the Atlantic on a grand scale.

## NEW COAL HEATERS

A new and economic method of household heating which requires only one coal fire for four rooms has been developed by a British inventor. The principle of the system is utilization of waste gases from the ordinary coal stove. The heater is similar in appearance to a normal grate, but the gases pass through a radiator which heats a panel facing the adjacent room.

The United Nations Relief and Rehabilitation Administration asserts Yugoslavia will probably be on starvation diet for the next two years. Hunger will prevail throughout the Danube Basin too. Some five million farm animals have been destroyed during the war in Greece, Albania, Yugoslavia, Czechoslovakia and Poland. It is planned to ship about 50,000 dairy and draft animals to these countries to help replace livestock herds.

## SAW ...

Harold Maxwell on Saturday last trying out a new dance step on his 21st birthday.

Ralph Atkinson and Elaine Torrance walking up the creek Sunday afternoon, going fishing. 1 presume.

Cpt. Elma White, RCAF, who has been on sick leave at her home in Carbon, left Wednesday for Calgary where she will spend a short time before leaving for Ottawa where she will be stationed.

Mr. Chas. Andrews met with an accident on the Drumheller road last week when his truck overturned. He was taken to the Drumheller hospital but the nature of his injuries have not been revealed.

## NOW IS THE TIME TO DELIVER YOUR WHEAT THROUGH POOL ELEVATORS

For the remainder of the present crop year, that is, up to July 31, farmers may deliver any quantity of wheat they wish. After July 31, however, the 1945-46 delivery quota of 14 bushels per authorized acre will be in effect. This quota, set by the Wheat Board, will apply throughout the province and deliveries will be definitely limited to the amounts allowed to each farmer under it.

Now is the time, therefore, to get your wheat delivered, unless you wish to keep it on your farm as a reserve. The place to take it is to your local Pool elevator. It is your elevator, built by you to give service at cost. It will be to your advantage to use it.

WORLD HAPPENINGS  
BRIEFLY TOLD

Bristol, England, is to set aside 50 per cent. of its temporary housing accommodation for members of the forces now on the waiting list.

The Lublin radio says that within a short time 500,000 Poles will settle in the East Prussian area of the Maurian lakes.

Between March, 1944, and February, 1945, 18,794 men were directed by the Ministry of Labor to underground coal mining in Britain.

Lloyd's of London issued its "shipping intelligence," suspended during the war for security reasons, for the first time in nearly six years.

The Dominion Bureau of Statistics shows that U.S. visitors to Canada in 1944 spent \$100,000,000, a 25 per cent. increase over 1943.

The Chinese foreign office at Chungking announced that China and Argentina have agreed to establish formal diplomatic relations and ambassadors will be exchanged shortly.

Trapped in three government-developed areas of Minnesota, \$500,000 crop of muskrat pelts was offered for sale at public auction in Winnipeg.

A \$1,000,000 laboratory will be erected in Ottawa in the post-war period to house laboratories of the department of health and welfare and further scientific research in the Dominion. Health Minister Claxton announced.

The Opebo chiefs of Nigeria have been paid the \$50,590 promised by the British government in 1939 if the heirs and successors of Chief Jaja kept the peace. Jaja was deposed in that year for acts of oppression against his own people.

## Experiment Ended

Pagan City Hitler Started Is Just Another Failure

Hitler's "strength through joy" automobile city, a mile from Jolly-leben, now is a picture of a vast dream shattered.

Here Hitler started what he boasted would become the world's largest automobile plant, and he made the new city an experiment in attempting to eradicate Christianity.

Hitler promised that every worker would be in a position to become the owner of an air-cooled, four-cylinder, 24-horsepower, five-seater driver, beginning in the last months of 1939. The price for this people's car was fixed at 890 marks (about \$396), and a special workman savings bank was started into which workers could pay as little as five marks monthly.

War broke out at the time fixed by Hitler for delivery of the first cars. No worker received his promised car, and his savings account was credited to the war loan. Only a few production units are intact enough to make a few cars daily for Allied military purposes.

Germany's youngest city also is doomed. Here Hitler was determined that officers and especially children should be reared in Nazi paganism. No churches were permitted, but instead a community house was erected as the city's center of "religious activities." There, for instance, the ceremony of "name-giving" as a substitute for Christian baptism was held.

That experiment also is ended.

A gale is a wind of considerable power, stronger than a breeze, but not severe enough to be called a storm.

## Appointed To Senate

H. Captain Brewer Robinson was carrying on as usual with his duties as Acting Overseas Manager of the Canadian Legion, when he heard of his appointment to the Canadian Senate.

The Captain's reaction was undemocratic. "It is nice," he said, "to know that I have friends at home."

Senator Robinson has many friends, on both sides of the ocean. He has been active politically in his native province of Prince Edward Island a good part of his life, having held the mayor's chair in Summerside, as well as a seat in the P.E.I. Legislature. He served in France from 1915 to 1919 with the 2nd Heavy Battery during the last war, and during the years of peace associated himself intensively with the affairs of the Canadian Legion.

The Senator came overseas as Auxiliary Supervisor attached to the Cape Breton Highlanders, in the 5th

Division. After serving with that unit in the United Kingdom, he transferred to the Personal Service Dept. of the Canadian Legion, in London. Since the return of Mr. Baile to Canada a short while ago, Senator Robinson has been acting as Overseas Manager for the Legion.

Senator Robinson feels that he will take with him to the Upper Chamber a considerable understanding of soldiers' problems, and how to deal with them. He fought with them in the last war, and has served with them well in this. He is convinced that the plans for the rehabilitation of Canadian servicemen and women far surpass those of any other country.

The Senator's wife is at present working in a blood clinic in Montreal, but after the war they will probably divide their time between Ottawa and Summerside, where he is associated with the P.E.I. Fur Pool Limited, a company formed by the breeders of silver fox.

## SET HIGH STANDARD

Lawrence Kay, a boy soprano from Edmonton, would "really sing" a place in the choir of the foremost British cathedral in the opinion of Dean Arthur Collingwood, who gave him 90 points for his singing in the solo class for boys under 16 years at the musical festival held in Calgary. "He has set a high standard for all the vocal classes of young singers which will be difficult to better," Dean Collingwood said.

There are a few cases on record where persons have been able to see Jupiter's moon's with the naked eye.

Mr. Churchill, in reply, declared: "I am deeply grateful to you for the message with which you have honored me although it is far beyond my deserts."

There will always be in my mind the breath of your vision, and your generous attitude in effecting the co-ordination and crystallization of our combined plans. Personally I will cherish the friendship and confidence you gave me during the seemingly slow and tortuous progress to the most complete victory in modern history."

Mr. Churchill, in reply, declared: "I am deeply grateful to you for the message with which you have honored me although it is far beyond my deserts."

## About U-Boats

The Submarine Still Remains A Terrible Weapon

Germany ended the war with her submarine fleet almost as helpless as the Luftwaffe. It was beaten in many a battle by sea and land. At sea more than 600 enemy U-boats were destroyed. On land, Allied forces closed relentlessly on the bases from which the wolf-packs issued.

Isolated merchant vessels were being sunk even as V.E. Day dawned. But the final undersea "blitz" with which Admiral Donitz planned to paralyze our Atlantic shipping was among the battles never fought. It was crushed before it got well started.

Nevertheless, Germany still had from 450 to 500 submarines when she surrendered. Of these 150 to 170 were in "operational status," though only about 50 or 60 were at sea. Virtually all were highly efficient craft, new 1,600-tonners fitted with the "snorkel breathing mast" to permit submerged battery-charging and apparatus to baffle our detection devices.

Only 41 of the cruising fleet have surrendered thus far; a few may have escaped to Japan; others are probably lost in actions not definitely counted as victories.

Except for a few Japanese craft which penetrated the Atlantic and those now operating in the Pacific, the submarine is no longer a menace. But it remains one of the most terrible weapons ever devised by man.

The submarine cannot successfully fight the submarine. No ship that exists can stand against its deadly torpedoes. No specific answer to it has yet been found. It was only by a combination of defences—in the ships, in the air, on the surface and beneath the surface, and a pooling of Allied material and strategic resources, that we were able to overcome it.

For a time, especially in the dark days of 1943, enemy U-boats seemed to be winning the war. All told, Germany launched more than a thousand of them. How many millions of shipping they sent to the bottom (two million tons in the first eleven months of the war, before they reached the height of their power) has never been fully revealed. But then we did, bit at a cost of life and treasure the world will never forget.

## FICTIONS AND FACTS ABOUT LEND-LEASE

Washington Throws Light On Numerous Fables

The Foreign Economic Administration at Washington took time to knock down a book of "fictions" about lend-lease.

Here are some of its "facts and fictions":

1. Fiction—The United States is sending to Britain as lend-lease several hundred thousand prefabricated houses which are taking a substantial part of our lumber supply.

Fact—The United States is using about two-thirds of one per cent of the national lumber supply in 1945 to provide 30,000 temporary houses to help replace a few of the 500,000 houses destroyed by the Luftwaffe and robot bombs.

2. Fiction—Britain is not getting any meat from Canada because she can get it from the U.S. under lend-lease.

Fact—Last year Canada shipped to Britain about one-third of her total meat production, including 700,000,000 pounds of bacon and 325,000,000 pounds of cattle.

3. Fiction—The Allies plan to use lend-lease materials and equipment in their export trade in competition with the U.S. when the war is over. This rumor frequently is concentrated on aircraft.

Fact—The U.S. retains title to all lend-lease material that has not been lost, destroyed or consumed and no disposition may be made of lend-lease property without American approval.

4. Fiction—Americans have some times heard that one reason for the cigarette shortage was due to the large number of cigarettes sent to other countries under lend-lease.

Fact—Lend-lease exports of cigarettes in 1944 were only about 15 per cent of U.S. production. For every cigarette lend-leased last year the U.S. sent 20 to American armed forces while civilians at home averaged 60. No cigarettes have been supplied for civilian use under lend-lease.

5. Fiction—A story appeared in various parts of the U.S. that American tourists in Canada have been asked to purchase all the butter they want at low prices. They allegedly found that the butter contained a lend-lease label.

Fact—Canada has received no butter under lend-lease. All butter scheduled for export under lend-lease has been sent to Russia for the Red Army. The proportion of the total U.S. supply sent to Russia was seven-tenths of one per cent in 1942, four and one-tenth per cent in 1943, four and two-tenths per cent last year and two and one-tenth per cent in the first quarter of 1945.

6. Fiction—The American shortage of beef and veal exists because large quantities are being lend-leased.

Fact—Only one and one-tenth per cent of the American beef supply and one and three-tenths per cent of the total veal supply was taken by lend-lease in the first three months of this year.

## Organized Sympathy

German Using Many Ways To Arouse Duty For Themselves.

The Germans are adopting all sorts of methods to arouse their patriotic feeling. They are using the word "federalization" like Frank Gillard, BIBC correspondent, says they try to catch the eyes and then the ears of our troops. Statches of conversation are made audible with the intention that they shall be overheard. They endeavor to arouse pity for themselves as the victims of devastation; they stress racial and cultural likeness between themselves and the Allies. They make special appeals for "generosity and fair play." They do all they can to evoke the sympathy of Allied men.

So far, Gillard says, "they've had to deal mainly with combat troops who've suffered enough at German hands to be hardened against all the wiles and wheedling of the civilian population. So the German propaganda failed entirely to break down the non-federalization rule."

The concerted efforts call to mind that Eisenhower, when asked towards the end of World War I what he would do if Germany had repudiated "Organized sympathy for Germany," —BIB London Letter.

## RESTORING RAILWAYS

Railway connection between Berlin and Moscow, with a single change at the Volga where passengers and freight are switched from the European to the broader Russian gauge, has been established. Red Army railway troops have in the course of the war restored and built nearly 70,000 miles of track and 140 miles of large and medium bridges.

Johann Gaus, German mathematician, discovered a mirror one inch square could flash a ray that could be seen seven miles away.

## Historic Sites

For Commemorating Places Of National Interest Throughout Canada

Members of the Historic Sites and Monuments Board of Canada held their annual meeting in Ottawa on May 16, 17 and 18, under the chairmanship of Dr. J. Clarence Webster of Shediac, New Brunswick, other members of the Board include Professor Walter N. Sage of Vancouver, British Columbia, Professor M. H. Log of Edmonton, Alberta, J. A. Gregory of North Battleford, Saskatchewan, Reverend A. D. E. Echebarrut of St. Boniface, Manitoba, Professor Fred Landow, Ottawa, Ontario, Honorable E. Fabre, Surveyor, Montreal, Que., Professor D. C. Harvey, Halifax, Nova Scotia, Major G. Lanet, and W. D. C. Croarty of Ottawa.

The Historic Sites and Monuments Board of Canada is an honorary body of well recognized historians who assist and advise the National Parks Bureau of the Department of Mines and Technical Surveys in the work of restoring, preserving and administering the national historic parks and sites in Canada. The board's jurisdiction covers places ranging in size from 2 1/2 to 230 1/2 acres have already been established and some 330 historic sites have been marked or acquired. Many more historic places are awaiting consideration by the Board and a third of the board's duties is the selection of the places to be added to the list. The past year development plans of the National Parks Bureau for acquiring and commemorating national historic places throughout Canada were also discussed.

The work of this body of historians relates very largely to the task of marking historic places connected with the development of our country rather than commemorating battles and bloodshed. It is the fervent hope of the board that this land should continue to have a history of orderly progress devoid of violent upheavals. In the past the board has been regarded as historic milestones pointing the way to enduring friendship between people of diverse racial origins who make up the population of this young nation.

Canada has been fortunate in that the nation which she has participated in modern times have been fought far from her own shores. The rest of the world has seen her gallant sons in far-flung battle-scarred spots which will forever be a part of Canada. Because there have been comparatively few battles fought on Canadian soil, most of our historic places relate to exploration, early trade, pioneering, missionary work, heroic episodes or to the birthplace of some of our most illustrious leaders. Accordingly the work of the Historic Sites and Monuments Board of Canada now deals mostly with commemorating the achievements of the men and women prominent in the world of science, art, music and letters; our poets, our painters, our writers and our public benefactors.

It is the duty of the board to ensure that the names of those who have given generously of their time and talents towards making this Canada a leader among the nations of the world are preserved in the world of the world.

## The Polar Bear

When In Captivity Bears Seek And Hunt Of Meat

John H. Spicer, in Our Dumb Animals, says: Although they live in the world's coldest climate, the male polar bears do not hibernate like their cousins farther south but remain active all winter.

This bears' white coat matches the snow so well that being able to see the bear in the first place is half the hunt. At least among some Eskimo tribes when a bear is killed half the booty is given to the hunter seeing it first.

They are one of the biggest land mammals, growing as much as 13 feet long and extremely heavy, yet their newborn cubs are extremely small and weigh only nine to 12 ounces.

Although they may never have tasted them before, polar bears in captivity enjoy seaweed just as much as any other bear does.

Contrary to the popular opinion, polar bears enjoy all the warmth they can get.

## EASY TO ANSWER

New York Sun says the New York Central System, planning the dining car of the future, is polling its patrons for suggestions. One of the questions is regarding preference for location of the diner on the train. The answer is that it is easy, the car next to the one in which the patron is riding.

South Africa is cooler than many places in the northern hemisphere because of its elevation and comparative narrowness.

THESE THREE NAZI SPIES WERE CONDEMNED TO DIE—These dramatic photographs show sentence of death before a firing squad carried out by three Nazi spies captured behind American lines during the fight in western Europe. Schofield for their mission by mingling with American prisoners were taken by the Nazis the three were garbed in American uniforms. Furnished with a radio transmitter, and slipped behind American lines to reconnoiter roads and bridges along the Meuse. Their ruse was discovered and they were captured. After trial before an American court martial they were bound to posts by military policemen, blindfolded and shot. At top, white disks are fastened over the heart of each condemned man. At bottom the volley has just been fired, and the spies hunch and sag against their bonds, as the firing squads march past the bodies.

## Fateful Five Years

World Owes Much To Churchill For Leadership During War

No other statesman in human annals has ever had a larger part to play than that which has fallen to Winston Churchill since he became the head of the British Government at a time of unparallel crisis for his country and for the whole world on May 10, 1940. As he recalled in his latest broadcast, the supreme task of his office was to lead his people through five years during which he had to face of prime minister, with all the perils that have been faced at all times of emergency, our admiration of his matchless leadership and our sense of debt to him were greatly intensified. Though his immense service to the cause of human freedom was recognized everywhere long before the hour of his triumph in Europe, the consciousness of this has been deepened with the final overthrow of the enemy by which we were most gravely threatened.—Edmonton Journal.

## Some Are Beneficial

Scientists Say Not All Insects Are Destructive

Of 425,000 species of insects known to scientists of the world, 8,500 are found in the United States. Of these, more than 60,000 are neither harmful nor helpful to mankind. Of the remaining species, about 10,000 are beneficial, as they prey on destructive insects, cause cross-pollination of plants or produce useful substances such as dyestuffs, lac, honey and silk.—Collier's.

## PROVED THEIR WORTH

The 59 destroyers the U.S. hailed out of retirement to trade to Britain for leased bases in 1940 have proved they still could take and give punishment in nearly five years of war duty. They remained in active British, Canadian and Russian service except for nine lost in action.

GUN CREW TRADES BLOWS WITH JAPS—On the slope of a hill on Okinawa, a marine gun crew has placed its 37 mm. weapon to trade blows with Japanese pillboxes across the way. Marines of the 6th Division repulsed an enemy counter attack as they pushed forward through the rubble and mined streets of the capital city of Naha.

## Wren Uniforms

Members Of Women's Royal Canadian Naval Service May Keep

Rit Habit  
Nimble fingers are going to be making over about 20,000 Wren uniforms sometime in the peaceful future, as a result of a naval service announcement that Wren ratings will be allowed to keep all the kit issued to them in the Women's Royal Canadian Naval Service.

This means an average of two summer and two winter jackets and skirts for each of the 6,000 Wrens now on active service. They will also have their sailor hats, adaptable to all kinds of millinery angles, tricorners, navy grousers for winter wear, and their gabardine raincoats, which look well as a casual coat.

Items they can't keep include long clasp coats, rubber boots, parka coats and similar outdoor issued on loan for certain duties. Another item they can't keep is their gas mask—but the Wrens say they won't mind this.

Wren officers, who buy their uniforms out of a special allowance at the time they are commissioned, will keep their own uniforms.

## Had Best Turnout

Princess Elizabeth Won In Private Driving Class At Horse Show

King George and Queen Elizabeth the Princess Elizabeth, driving her pony, Gypsy, in a back pasture built for Queen Victoria, with the private driving class for the best single turnout at the Royal Windsor Horse Show.

Princess Margaret, dressed like her sister in a tuxedo coat and skirt and wearing a colored scarf over her hair, sat as Princess Elizabeth's passenger in a top-hatted gown in the back seat.

The Duke of Beaufort presented Princess Elizabeth with an oil painting by Gwyn Jones of herself driving her Norwegian pony, with which she won the show last year.

Cool jars of hot canned fruits out of a pot to prevent cracking.

## Chinese Were First

To Discover A Practical Method Of Making Paper

No less than the great timber limits, farm woodlots contribute their quota of the pulp for the manufacture of newspaper. In Canada the manufacture of paper began early in the last century. The first mill being installed at St. Andrews, near Lac, in Lower Canada in 1803.

The Chinese were the first to discover a practical method of paper making by the weaving of fibres. The Arabs of Samarkand acquired the art from the Chinese and were followed by the Persians. The Moors introduced paper making into Europe in the 13th century through Spain as they did agriculture after that art had been lost and forgotten during the dark ages.

From Spain, paper making spread to Italy, France, the Netherlands and Germany. It was begun in England in 1492 but apparently died until reintroduced 100 years later. However, it did not become firmly established until the end of the 17th century.

## CROWN JEWELS RETURNED TO LONDON

Have Been Returned From Safe Hiding Place

The crown jewels, stored in underground passages at Windsor castle since the beginning of the war, have been returned to London but they are at the Bank of England and not in their customary resting place in the tower of London.

The wall of the jewel house at the tower was damaged by a bomb blast and until it has been repaired the jewels will remain at the bank. When the guard of beef-eaters which was disbanded during the war will be formed again and a few keepers of the crown jewels will be appointed.

Armed Scotland Yard detectives moved the priceless jewels from Windsor to London, travelling in two automobiles.

At Windsor, on the Thames, 22 miles west of London, the treasures were stored in passages 30 to 40 feet underground. Only the king, the queen and a dozen officials knew they were there. Their Majesties visited the hiding place several times.

## A Strange Story

How The German Statue A Priceless Marble Statue

A strange story might have been told from Bruges by the best known of all London vicars, Mr. P. T. B. Clayton, the padre of Tog H. When there met the Anglican vicar to the British Legation, Mr. H. J. Hilary, who told him how the great Michelangelo statue was taken by the Germans from the Church of Notre Dame of Bruges. This marble statue is one of the world's major art treasures.

Mr. Hilary's story told him that the statue was saved from being destroyed by German officers, who took the statue to the British Legation in a trolley car on which, after much work, their soldiers set the Michelangelo statue and took it to one of a string of Red Cross wagons that were drawn up outside. The statue and a priest who had hurried to the place protested and begged, but the statue was taken, and then its plinth, and then a number of paintings out from their panels.

All the terrified captives could learn from the looters was that these treasures were to be taken to Germany. He was away, and he did not know. There was a horrible rumor in Belgium, Mr. Clayton said, that the ship which had been sunk by Allied air attack—Manchester Guardian.

## Anything But Heroes

Himmler And Other Nazi Criminals Showed Themselves As Cowards

In death, if not in life, Heinrich Himmler proved himself a thoroughly considerate. He saved the Allies the trouble of putting him to trial, convinced that he was a coward. Doubtless his primary purpose was to save himself from the degradation of being put in a store for him. Doubtless, also, he thought that a speedy death by his own hand was much too good for him. But he is just as dead as he would have been after the hangman had finished with him. Moreover, by this act he deprived himself of any remote chance of obtaining in the eyes of other Germans a spurious martyrdom. Martyrs don't carry little vials of poison with which to take themselves out of the pains and perils of trial and execution. No heroic sagas will be based upon the last hours of such Nazi-Fascist supermen as have already gone to their last account.—New York Sun.

For HEALTH'S SAKE

A middle-aged woman went to a well-known master for singing lessons. At the end of the second lesson the master had to tell her that her car was not true. She received the remark calmly, and at the next lesson sang as badly as before.

"You can never learn to sing in tune," "Oh, it doesn't matter," was the surprising reply. "I don't care any thing about music; but the doctor said that singing would be the best thing for my dyspepsia, so I decided to take lessons."

REASON NOT KNOWN

Export of false teeth to South America has taken a tremendous surge. Pan American Airways officials recently told Mr. Charles H. Clark that they had recently carried more than 500,000 artificial choppers in one week.

It takes a tank car of gasoline—8,000 gallons—to fill a B-29 Superfortress.

# OUR COMPLETE SHORT STORY—

## Jealous Husband

— By —  
MARCIA DAWCHERY

McClure Newspaper Syndicate

"Tommy Anders going to the dinner tonight?"

Iris stared unshapily at her husband's grin, as he let in the clutch and the sedan shot away. "I don't know."

"Lewis Aho?"

"Oh, Gregg, what difference does it make? No matter who the extra man is, you'll be jealous of him. Sometimes I think you'd suspect me of making eyes at the Hunchback of Notre Dame."

Gregg parked and alid from under the wheel leaving the motor running. "Going to get some cigarettes and leave you to dream about . . . his smile was light-lipped, as if he were the guy. And if I ever catch you with him, I'll blow his head off."

Relaxing with a sigh against the seat back Iris thought, Gregg is getting psychopathic. I wonder how much longer I can stand this jealous hostess.

She closed her eyes when she heard his brisk step on the street, and remained possum-lidded as they charged down the highway, turned the corner on whining tires, shot westward. "There's no scene in driving so fast," she complained.

"Keep your trap shut," ordered a strange voice.

Iris sat up as her heart leaped into the top of her head. The man at the wheel was young—no older than 28—and there were hungry-bellows be-

come. But you have a shovel, and it seems to me . . ."

Her companion's lower lip hung lax. "Maybe it's a trap," he grunted. "But I'm game to find out. If it's O.K. with you, I'd like to talk to your husband tonight."

To prove his belief in her the man added, "You drive back to town. Stepping into the road, he circled the car and got in on the other side. "See, I gave you a chance to leave me if you were just fast-talking yourself out of a tough spot," he explained.

As they headed cityward, Iris recalled Gregg's final statement: "If I ever catch you with him, I'll blow his head off."

If Gregg saw her with this stranger he would shoot first and ask questions afterwards. "Try to be alive in me, as I've already proved my belief in you," she began. Swiftly she explained her fear.

The man scrutinized her. "Is your own right? Have you been cheating?" No use lying to me, you know."

Iris eyes met his. "No," she said. "There's never been any man for me but Gregg. I don't think there ever will be, because I happen to adore him. I'm humoring, suspicious, but I'm not."

"That's good enough for me," said her companion. "You give me your husband's name and address and I'll show up at his office tomorrow morning. That will give you time to explain things to him, and if he's half as smart as you are, I'm the luckiest sucker on earth."

"His cards are in that check compartment."

He slipped one into his pocket. "You can let me out at the next corner, man. Tomorrow morning is a deal."

At nine he walked into Gregg's office.

"If you think you're going to get paid . . .," he bellowed Gregg.

The man grinned. "I don't want your dirty money. You're going to give me a job to earn my cash honest. I found out what you needed to keep without dumping me. That woman is four square, and no mistake, and if you don't give me the hole contract I'll tell her that you figured her alleged boy friend was following your car last night. Also that you suspected they were going on a private party after she dropped you at the club, and you hired me to find out. Give, big shot—give!"

## 2-Way Wraparound

4726  
12-15

By ANNE ADAMS

Double front gives double service! Pattern 4726 wraps to left or right, adjustable to your position. Cool control or all-purpose tread. 20" Pattern 4726 comes in "Mud" and "Winter" sizes 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48. Size 36's, 38's, 40's, 42's in material.

Sent twenty cents (20¢) in coins (stamp cannot be accepted) for this pattern. Write plainly: Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 St. James Ave., Winnipeg, Man. "Because of the slowness of the mail delivery of our patterns, you may take a few days longer than usual."

## More Important Now

Mail For Armed Forces Should Carry Complete Return Address

A complete return address on all mail for the armed forces is more important than ever at the present time. The movement of members of the armed forces will increase rather than diminish with personnel changing units, returning to Canada or proceeding from Canada overseas. All these movements complicate the delivery of their mail. Under these circumstances, the postal authorities urge that a complete return address be placed on all mail to ensure its prompt return if undeliverable.

North America's tallest bird is the sandhill crane. When standing erect, the male is about as tall as the average man.

**A COUNTRY EDITOR LOOKS AT**

**OUR CANADA**

BY JIM GREENBLAT

Who ever heard of a henpick in July? Believed to be the first ever held in Canada, such a mid-summer event is scheduled for Nelson, B.C. Thespiel will last two or five days, limited to a 5-nick entry with four main events. The Nelson Centre is co-operating with the Curling Club in promoting the henpick. Artificial ice, of course, but it should attract lots of attention.

The Rostered Eagle in Saskatchewan makes this comment: "The soner transportation to the United States can be found for those 34,000 English brides of American fighting men, the better. A shipload of English girls is worth more than their weight in diplomats in cementing the bond of friendship between the people of the United States and Great Britain."

This is not built: An auction sale of animals by Claude Gallagher of Kelowna, B.C. held in Kamloops, British Columbia, Al. The British and the U.S. pay on the average \$1500 each for 25 bulls, \$1200 each for 11 heifers. Top prices were \$4500 for a yearling bull, a top heifer brought \$2600.

Age, well spoken: John Pindersey of Kamloops, B.C., speaking at a Chamber of Commerce meeting at Salmon Arm, said: "There are too many 'hushes' British Columbia and Manitoba. Ontariobians and not enough Canadians in Canada. In the critical days to come, Canada will need all the Canadians she can get."

Tail stories now come from Colorado, Ont. because the industrial relations committee of the Chamber of Commerce has helped to make him.

Edgar, of Peterborough looks at new factory in Colours. The new industry will manufacture fishing boats, split rings, swivels and reels at the first unit of operation. The post-war industry, will employ 30. Such are springing up all over Canada in smaller centres.

V-E Day lines called at random from the weekly press: There can be no question that our victory of today was divine intervention. The Lord hath done great things for us, whereof we are glad. . . . Management and labor leaders have agreed, critical job that requires the maximum of good sense, understanding and well-wrought out policy. . . . We can learn to live together and work together in the interests of everyone in peace as in war—years spent in danger were not meaningless.

Meanwhile Canada has an important job in saving thousands from starvation by sending supplies to Atlantic all possible food supplies. The expressions will vary in word and form, but the spirit of gratitude will be universal. The annual Time known no brighter day than this.

Pine tribute: At Baras Corners, N.S., Don Richardson, 20, finished 50 years as Sunday school superintendent of the United Baptist church. On a recent Sunday they held a special anniversary service for the deacon, with a fine original program suitable to the occasion.

Nova Scotians await with interest the development of the proposed Petrolite power project. The report of the engineers is to be on tap any time now. Premier Jones has stated the cost of development might be as low as \$97 per horsepower, which would make it cheapest in the world. A proposed tidal project in Great Britain is to cost \$680 per horsepower.

Bits of Canada: Announcement of the death of the first soldier from Gregg's Landing, Ont. to die in World War II came incidentally at the conclusion of the V-E Day church service attended by all in the village; as was Ray Thackeray, 20, of Belleville, Ont. a woman walked into a butcher shop, asked for a roast in the refrigerator, told it was sold, whipped out a gun and got it. At Beverley, Sask. Tony Schenker's billpost climbed in the cab of his pickup truck, two columns of mud, and passed out forever. At Bowmanville, Ont. a marriage united Dorothy Clark and George Mutton. Ontario, again holds the spotlight. At Newmarket, two soldiers were convicted for breaking into a grocery store and stealing a tin of tooth, took a bite on a piece of cheese, later was traced through this. . . . The Alaska Highway gives goats over the story that Wayne "Rocky" Smith, who hails from Glasgow, Sd, sat at the Pomeroy Cafe, drank two dozen fried soft eggs and polished them off at one sitting.

## Peace Garden

Memorial to A Great President and Good Neighbor

The Peace Garden seems a most suitable place for a memorial to a great president and a Good Neighbor of Canada. Situated in the Turtle Mountains of Manitoba and North Dakota, the Peace Garden is close to the geographic center of the continent, and has been developed by citizens of both Canada and the United States. It was designed as a memorial to the long-standing friendship between the two countries and as a pledge to the continuation of the harmony which has endured for more than a century.

Certainly the International Peace Garden seems an ideal location for the building of a lasting tribute to the man who above all others contributed to the deepening and brotherhood of that harmony. Winnipeg Tribune.

Catgut for the strings of violins never comes from cats, according to the Encyclopedia Britannica. It is taken from the intestines of sheep, horses and mules.

### MEAT STRETCHING EXERCISE

One, two, three—STRETCH! It isn't the newest reducing exercise, but the routine of a thrifty housewife planning this week's meals. For stretching budgets, without sacrificing wholesome goodness and appetite appeal in those three-times-daily meals, is one of the basic and vital jobs of home-makers today.

An important culinary trick for stretching the budget—and making thirty main dishes even more inspiring to the appetite—is to use crisp cereal, that familiar breakfast standby, in a wide variety of main dish specialties, as a delicious extender of protein foods.

The mild but distinctive flavor of these crisp flakes can prove a perfect flavor-complement for all sorts of meats and fish—far more leftovers too. The use of prepared cereal as an extender for meat dishes is a time-saver for busy home-makers, for corn flakes, crisp and golden brown, roll easily to crumbs of any desired texture.

A tip for good cooks is that the simplest method of preparing crumbs for use in meat and fish dishes is simply to wrap corn flakes in a clean towel, making sure that all ends of the towel are carefully tucked in, and apply the rolling pin with a light hand. It is the work of seconds to produce crumbs of just the proper fineness.

The light from the sun reaches our earth in 499 seconds.

**"Take it easy, Darling!"**

If everybody and everything irritate you, some tea should be done. It's the cause—perhaps the cause, perhaps you can't sleep in tea or coffee is the cause. Perhaps you should drink Postum instead!

Postum is a grand drink! Not like tea, not like coffee, but so downright delicious you'll love it just for its own sake. And Postum contains no caffeine, nor any other drug to affect a heart, nerves or digestion. Made instantly in the cup! It costs less than 1¢ a serving. Try Postum today!

**Firestone**

THE ONLY SYNTHETIC RUBBER TIRE

**PROVED ON THE SPEEDWAY AT 100 MILES PER HOUR**

CAR owners have been wondering just how safe synthetic rubber tires are—just how much mileage they will give. Firestone decided to put its tires to the supreme test. So a race car was equipped with regular Firestone Synthetic Rubber Tires, the same as you can buy for your car, and raced for 500 miles around the Indianapolis Speedway under American Automobile Association supervision.

Wilbur Shaw, famous three-time winner of the Indianapolis 500 miles, volunteered to make the run. And he averaged 133 miles an hour, he made the run in 3 hours, 45 minutes, 40 seconds. Imagine the punishment those tires took as they bounced over the rough brick and grinding asphalt—equal to 50,000 miles of ordinary driving. Yet, in this grueling, tire-torturing test, not a sid or blowout occurred.

Remember this fact when you get permission to buy new tires—Firestone are the only tires made that are proved on the speedway for your protection on the highway.

**WARNING—The tire shortage is now serious. Order early, and you can get better for many months. The only way to keep your tires is to continue to use them. Use them until they are worn out. Then, if you have a spare, use it. If you don't, you'll have to wait. Your Firestone dealer will help you make this plan.**

CANADA ALLOTTED FIVE  
PER CENT OF WORLD SUGAR

Increase in beet sugar production in Canada would not add any appreciable amount to the stock of sugar available to Canadian consumers. Wartime Prices and Trade Board officials point out, commenting on the suggestion made in some quarters that a cut in the Canadian sugar ration might have been avoided by doubling the Canadian acreage in sugar beets.

The world supply of sugar has been pooled under an agreement between Britain, Canada and the United States. Given an allotment

JOBLESS INSURANCE  
FUND \$270,000,000

Canada's unemployment insurance fund has reached the \$270,000,000 mark, and is growing at the rate of more than \$5,000,000 every month.

Some 3,000,000 Canadians are insured under the Unemployment Insurance Act.

So far, unemployment insurance benefits paid out total about six million dollars.

on the same per capita basis as the other two countries, Canada is allowed five per cent of the world's supply.

While an increase in beet sugar production in Canada would slightly increase the total amount of sugar in the world, lower now than in previous years, this increase would have to be shared with the other nations drawing from the sugar pool. Consequently, Canada's share would be very small, possibly about 1.50 of a pound per person per year.

## LOCAL NEWS

We are sorry to learn that Mrs. M.A. Harvey is a patient in the General hospital where she underwent an operation. She is making good progress and we join in wishing her a speedy recovery.—Acme Sentinel.

Miss Christina Harvey left last week for Saskatoon to spend her holidays.—Acme Sentinel.

I. Guttman was a Trochu visitor on Sunday.

Miss Adeline Martin is on the job again after spending a week's holiday at Drumheller.

C. H. Nash is spending the week at Banff taking a well-earned rest.

Mr. and Mrs. Glen Farrow of Three Hills and Mr. and Mrs. Albert Arvidson of Trochu spent Sunday last in town visiting with Mr. Guttman.

Services will be held at Christ Church, Carbon, on Sunday, July 1st, at 11:00 a.m., with Rev. T.B. Winter in charge.

After spending a three weeks' leave here, Pies. Sammy Goudie and Earl Clayton left Wednesday for their new posting at Camp Borden, Ont.

Mr. Aaron Klassen of Calgary was a business visitor in Carbon last week.

Mr. and Mrs. Jas. Smith and Mr. and Mrs. W. Poxon of Drumheller were Carbon visitors Friday.

Calgary visitors last week were Mrs. C. Cressman, Mr. and Mrs. R. Shaw, and Mr. Syd. Wright.

Mrs. Ross Fraser was taken to the Drumheller hospital last Wednesday.

Miss Peggy Heath returned to Vegreville hospital last Wednesday after spending three weeks at her home at Hesketh.

Syd. Wright, who recently constructed a "lift" for the Builders' Hardware Store at Wetaskiwin, went up Tuesday to instal the new apparatus.

The old sidewalk in front of the post office has been taken up and a new walk is being constructed on the west and south sides.

Mr. and Mrs. Jas. Smith and Roy visited in town Monday on their way out to Kelowna, B.C., where they will again take up residence.

Mrs. Sid Wright and infant son, and Mrs. C.T. Ross and infant daughter have returned home from the Drumheller hospital.

## CANADIAN PRISONERS FREED

By the end of May, three weeks after Germany's unconditional surrender, 5,085 Canadian prisoners of war had been released, leaving only 184 unaccounted for. Most of these were probably prisoners who escaped from the lines of men being marched back from the fronts. The number of prisoners in the Far East remains at 1,504.

Colonel (after reviewing troops): "Hang it all! What's the idea of parading all the big men in front of the little men?"

Lieut.: "It's the sergeant's fault. He used to run a fruit stand."

Old Maid: "I can't decide between the divan and the arm chair."

Clerk: "Lady, you can't make a mistake on a nice comfortable arm chair like this."

Old Maid: "O.K., then I'll take the divan."

## GOOD OLD AMERICA

A Russian, recently returned from America, was telling his old friend Boris of his adventures. "In America," he said, "you drive around in a limousine—for free. You eat dinner in the best hotels—for free. You get all sorts of beautiful clothes—for free. You stay in wonderful rooms—for free."

"All this happened to you?" asked Boris.

"To me, no—but to my sister, yes."

RDX, the world's most powerful explosive, is manufactured in Canada and the United States under a process worked out by two Canadian chemists.

In five and a half years of war, approximately 15,000 aircraft have been produced in Canada.

Extension of war service gratuities to include Canadian foreign-going merchant seamen has been authorized by the Canadian government.

## FROM CANADA TO CALCUTTA

Your bank is a link between the man in Canada who has goods and services to buy or sell, and his customers abroad.

The business of your bank is not all done in dollars and cents. It renders valuable service to Canadian business in the far-off market places of the world, overcoming the obstacles of strange currencies, be they pesos or piasters, escudos or rupees.

Through its commercial correspondents and business connections all over the globe, your bank often has the specialized information necessary to bring buyer and seller together, no matter how far apart they live.

Your bank is able to gather information on the reliability of foreign firms, to handle letters of credit, to arrange the complicated exchange of funds, performing an individual, intricate and inexpensive service to importers and exporters alike.

This feature of Canadian banking has a direct bearing on your welfare. It has, through many years, developed the sale of Canadian goods abroad, resulting in more jobs for Canadian men and women.
